## About List-o-Rama!2

List-O-Rama will allow you to generate nice CSS inline menus in seconds. Just walk through the wizard and insert the text of the links, choose the vertical or horizontal menu, pick the design and click on finish. The code is automatically generated and inserted in your page. It can't get any easier than this.

The extension is inspired by Ian Lloyd's List-O-Matic at [www.accessify.com](http://www.accessify.com), and is free for all to use.

## Features in Detail

- **22 Stylish CSS Designs Included** - Various styles to fit your web site perfectly.

Horizontal menus

Tab menus

Vertical menus

- Automatically insert a Vertical, Horizontal or Tab menu through the wizard – You can easily insert a menu by following the easy steps in the wizard.

- **Add your list of navigation links** – Simply add your links through the wizard.

Need to create all kind of great web site navigation menus? Cascading Drop down Menu, Mega Menu, Popup or Context Menu. Menus that have great display animations, are CSS based and fully cross browser compatible, which makes them search engine friendly?

Then you need the Universal CSS Navigation Menu from DMXzone >>

- **Code is inserted automatically** – All you need to do is to select the items for the menu like Home, etc. and the necessary code is inserted.
- **Automatically generates the bullet list** – After you have selected the menu you would like, it will insert the necessary bullet list.

## Before you begin

Make sure to setup your site in Dreamweaver first before creating a page. If you don't know how to do that please [read this](#).

## Installing the extension

Get the latest extension manager from Adobe at [http://www.adobe.com/exchange/em\\_download/](http://www.adobe.com/exchange/em_download/)

Open the .mxp file (the extension manager should start-up) and install the extension.

If you experience problems please read the FAQ at <http://www.dmxzone.com/index?7/1026> before contacting support.

## The Basics: Creating an Inline CSS Menu

In this tutorial we will show you how to create an inline CSS Menu using the List-o-Rama!2 extension.

\*You can also check out the video [here](#).

## How to do it

1. Define your site in Dreamweaver and create a new page.
2. **Applying the extension** – Choose the  icon from the DMXzone object bar to apply the extension.

The List-o-Rama!2 dialog appears:

3. **Adding menu items to our menu** – First add your menu items by clicking the “+” button, enter a name for the item, title and link. When you’re done click **Next>**.
